EDUCATION

Narula Institute of Technology, Kolkata
Bachelor of Technology in Electronics and Communication Engineering

November 2020 – August 2024
9.2 CGPA

PROJECT

Stack Overflow Clone (CRUD Application)

It is a website where you can make your own account and ask your questions and can give an answer to anyone's question just like stack overflow.

Chat bot is integrated to the site. You can also login through a dummy account.

Tech Used- CSS | Node.js | React.js | MongoDB | API | Heroku | Netlify | Firebase **Link -** [StackOverflow Clone](#)

Tic Tac Toe Realtime game Application

This is not only a tic tac toe game it is a realtime multiplayer game, it is made using socket.io.

2 players can enter into the game with their device and can enjoy the game.

The automated version is also available.

Tech Used- HTML | CSS | JS | Node.js | Socket.io | Heroku **Link -** [Tic-Tac-Toe](#)

Algorithm Visualizer

This is a website to visualize the sorting and searching algorithms. And many flexible features available for the users.

Tech Used – HTML | CSS | JS | AWS **Link -** [Algorithm Visualizer](#)

***Many more projects available on my Github Account ***

WORK EXPERIENCE

Web Development Intern

Binerr

November 2021 – January 2022

Designed and Developed their website from the scratch. Their main focus was to make a website on blockchain development.

Implemented the whole frontend site of them.

Tech Used – HTML | CSS | Bootstarp | Javascript

Full Stack Web Development

NullClass

November 2022 – Decemnr 2022

In this internship I made a stack overflow clone during their course.

And I have to implement 3 things in that website. First was to make a dummy user account, second was to make a chatbot, last one was to show the users location.

Tech Used - AWS

TECHNICAL KNOWLEDGE

STRONGEST AREA: OOP | Data Structures | Web Development
